

The Chemical Company

August 12, 2014

To Whom It May Concern:

BASF often receives requests for the Volatile Organic Compounds (VOC) content of WALLTITE v.3 as it relates to LEED.

While the question of VOC content does not apply to insulation products, as it does to adhesives and paints, we are supplying the data solely for comparative purposes.

The VOC content of WALLTITE v.3 has been calculated at 3.9 g / L based on the liquid chemicals of this two component system.

Sincerely,

Sharon Lishman
Marketing Manager
